

ACCIDENTS

Each principal shall develop a program of accident prevention suited to his/her school. The chief school administrator shall review and approve such programs. When unforeseen situations arise, and an accident occurs, a school nurse or other assigned staff member shall be responsible for providing emergency services to a child or staff member. The medical inspector shall prepare a list of first aid treatment for the most common minor injuries. This list shall be made known to the staff.

Guidelines for Dealing with Accident/Injury

- A. The school nurse or another trained person shall be responsible for administering first aid. Universal precautions shall be taken in the handling of blood and body fluids to ensure the containment of blood-borne pathogens. (See policies and regulations 4112.4/4212.4 Employee health and 5141.2 Illness).
- B. In all cases where the nature of an injury appears in any way serious, every effort shall be made to contact the parent/guardian and/or family physician immediately.
- C. Parents/guardians shall be requested to pick up their child. Therefore, at the beginning of each school year, the parent/guardian shall make arrangements for proper care in the case of an emergency or acute illness. Emergency cards shall be accurately filled out. If a parent/guardian is unable to provide such transportation, no pupil who is injured shall be sent home alone. A pupil who is injured shall not be taken home unless it is known that someone is there to receive him/her.
- D. The parent/guardian shall specify on the emergency card the hospital to which the child is to be taken in emergency cases. They shall specify the physician to whom the child should be referred. If the parent/guardian cannot be located immediately and more than emergency treatment is necessary, the physician named on the emergency card shall be called. In the event the physician cannot be reached the school medical inspector shall be called, He/she will then make the decisions regarding further treatment and care. In extreme emergencies, the school nurse, school doctor or principal may make arrangements for immediate hospitalization of injured pupils, contacting parents/guardians in advance if at all possible.
- E. The teacher or other staff member who is responsible for a child at the time an accident occurs shall make out a report within 24 hours on an official form providing details about the accident. This shall be required for every accident whether first aid is necessary or not.
- F. Any injuries or accidents to pupils shall be reported as soon as possible to the chief school administrator and the board.

Staff shall be informed at the beginning of each school year of the accident prevention program and procedures to be followed in case of an accident/injury.

Emergency Medical Procedures for Sports/Athletics

The board of education recognizes its responsibility for pupil safety encompassing all aspects of sports and athletic events in both intramural and interscholastic programs. The board directs the chief school administrator to develop and implement emergency medical procedures to ensure delivery of appropriate emergency medical services for all practice sessions, competitive

contests, games, events, or exhibitions with individual pupils or teams of the schools of this district whether among themselves or with pupils of other districts.

The board further directs that these emergency medical procedures be disseminated to appropriate personnel within this district and address practice sessions and both home and away events.

The board directs the chief school administrator to report on the effectiveness of the emergency medical procedures to the board annually for its review.
